FutureRx

Full Stack Developer

Thank you for the opportunity to apply for your undefined role at FutureRx. After reviewing your job description, it's clear that you're looking for a candidate that is extremely familiar with the responsibilities associated with Full Stack Development, and can perform them confidently. Given these requirements, I am certain that I have the necessary skills to successfully do the job adeptly and perform above expectations.

I am a passionate, self-motivated developer and I had the privilege of working for Backstreet Surveillance in a Full Stack Developer role, where I have learned valuable professional skills such as web metrics, creative web design and web page content management. I also was instrumental in Backstreet Surveillance winning the "Best in State Award" for best inventor. In both my academic and professional life, I have been consistently praised as detail oriented by my professors and peers. Whether working on academic, extracurricular, or professional projects, I apply proven analytical, technical and teamwork skills, which I hope to leverage into the Creative Web Designer role at your company.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I look forward to elaborating on how my specific skills and abilities will benefit your organization. Please contact me via email at stephanmfalcon@gmail.com to arrange for a convenient meeting time.

Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,

Stephan Falcon

Work Experience

Trapdoor Creative - Full-Stack Web Developer - may 2022 - present

- Worked with international team members located in Europe, demonstrating strong communication and collaboration skills across time zones.
- Implemented WebRTC for real-time communication within the platform, enhancing the user experience.
- Participated in code reviews and contributed to the development of best practices, improving overall code quality.
- Demonstrated a strong understanding of front-end technologies, including HTML, CSS, and JavaScript, to create visually appealing and intuitive user interfaces.
- Implemented new feature into user control panel using reactjs, react router, and firebase.

Backstreet surveillance - Full-Stack Web Developer - March 2020 - April 2022 | 2.2 years

- Received the "Best of State Award" for Best Inventor, recognizing outstanding innovation and creativity in the company's products and services.
- Successfully led the migration of a legacy PHP Magento 1 website to a modern and scalable Magento 2 ecommerce platform, resulting in improved site performance, stability, and security.
- Designed and developed engaging and user-friendly product pages and core features, optimizing the customer journey and driving higher conversion rates.
- Implemented effective SEO campaigns that boosted organic traffic and improved search engine rankings, resulting in increased brand visibility and revenue growth.
- Innovated and developed a "kit builder" application,built in reactjs, that simplified the decision-making process for new customers, resulting in higher customer satisfaction and increased sales.

Guava Software - Full-Stack Web Developer - Feb 2019 - March 2020 | 1.2 years

- As webmaster for DEF Company, I oversaw the maintenance and updates of multiple company websites, including ensuring that content was relevant and up-to-date, and implementing user-friendly designs to improve the user experience.
- Collaborated with a remote web development team at GHI Company to deliver innovative front-end and back-end solutions. As a key contributor to the team, I was responsible for developing new features, performing quality assurance, and maintaining a high level of communication with my team members.
